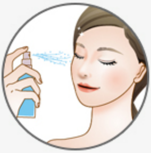
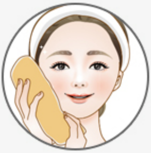
Versatile SHO usage



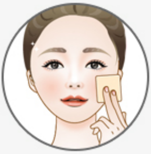
When dry

Sprinkle on face body over time when drying. In addition to immediate moisture supply, you can feel natural flame effect.



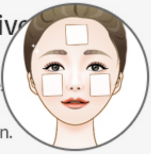
After cleansing

The most water loss after cleansing. Spray mist directly at this time, you can maintain a moist skin without drying gaps



When the skin is sensitiv

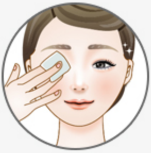
Sprinkle a lot of mist on a cotton pad or mask sheet and put it on your face. The irritated skin quickly calms down and regains the original skin condition.



When the skin tempera

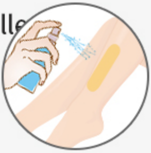
In the hot summer months, you can freeze the cosmetics that soak up the mist in the freezer and use it as a cooling pack.

Not only the cooling effect but also the moisture supply is one and two.



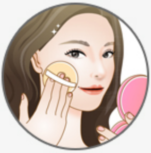
When the eyes are swolle

Moisten the mist thoroughly on the cotton swab and put it on the eye.



When to epilate

If you have red hair after epilation, please spray mist. The mild ingredients of Mist will calm down quickly.



When making up

If you spray mist before the makeup, the keratin is soothed, and the makeup is not exaggerated and the adhesion of the foundation is enhanced. And if you apply mist to your makeup skin from time to time, you can maintain a moist makeup just like the skin you just made.
