Vitality to the Fatigues Skin

A double functional essence helping the moisture loss management of the skin and dry skin management by containing Lanolin, a substance of the oil extracted from wool, provided by Australia. The light oil type product is rolled on easily onto the skin to be absorbed with moisture, and the Australian eucalyptus leaf extract, and the Trifolium pratense leaf extract, known as red clover helps in maintaining the healthy and smooth skin.

- **Skin** Regeneration
- **Aging** Enhancement
- **OK for** sensitive Skin
- **OK for** dry skin
- Enhancement of Elasticity
- Full of Moisture

All of these good traits in Rodin SSO Essence!

Lanolin extracted from wool

LANOLIN?

We have used the wool oil produced in UKAS facilities. Approximately a century ago, they discovered that the rough hands of the shepherd boys shearing the wools in Australia becoming silky soft. The long research of the cosmetics corporations have discovered that the secret is the lanolin oil secreted from sheep, and because of its moisture and skin-protection function, it was used as the main ingredient for moisturizing cosmetics. Because of the similar substances to the human skin, it effectively protects the skin from environmental factors such as the dry and cold weather, and air conditioning, and it is especially helpful in maintaining the dry and cracked skin soft and moist.

Corporation Sharing the Beautiful Happiness

CORÉANA COSMETICS

Art Through Nature
Coréana
코리아나 화장품

Coréana Cosmetics, corporation pursuing happiness while creating beauty

Coréana cosmetics has grown to be ‘a corporation pursuing happiness considering the nature and the environment with the slogan ‘Art Through Nature’ since its foundation in 1988

Coréana Cosmetics, having grown continuously for 25 years based on its management philosophies ‘ customer satisfaction’, ‘precision management’ and ‘principle of luxury’ is forming its research and development and manufacture infrastructure through Songpo Technical Research Center and the cosmetics factory, and is operating the Coréana Cosmetics Museum, Coréana Art Museum and Coréana garden to share and distribute the environment-friendly culture and the value of beauty culture.

Coréana Cosmetics is a domestic corporation with the R&D and the manufacture systems, and provides the cultural space and resting space for the community residents to attribute not only the external beauty but the internal beauty through mental elevation, fulfilling its roles and responsibilities as a corporation pursuing true beauty.

Craftsmanship to Produce Luxury Goods

Coréana Cosmetic’s first factory and the second factory has the cosmetics manufacture capability of annual 4,600 tons. The 1st factory was built in 1990 to be certified CGMP (Cosmetics Good Manufacturing Practice) in all sectors in 1996, and gained ISO 9001 from German RWTUV in 1998 to be the first corporation to gain both the CGMP and ISO 9001 to produce luxury goods heightening customer satisfaction. Also in September 2008, it was certified as a producer of organic cosmetic products from Ecocert, heightening its global competencies regarding the environment, quality and safety. In January 2014, it was certified of ISO22716, increasing the global competencies regarding product safety and quality management even further.
